✨ Happy Child School Website Sitemap

Welcome to the ultimate guide for designing a feature-rich, digital-first school management system that enhances learning, simplifies administration, and increases engagement across all users—students, parents, teachers, and administrators.

This site will use **Supabase** as the backend for real-time database, authentication, file storage, and role-based access. Frontend and backend will be integrated for smooth, real-time user experiences.

🏠 1. Home

- Welcome Banner with animated mission and values
- Hero Section featuring student success stories
- Animated counters for quick school stats (students, teachers, achievements)
- Auto-sliding news highlights
- Mini calendar widget for upcoming events
- Skeleton loading effect for faster visual loading
- Quick access links (Admissions, Portal Login)
- Interactive testimonial carousel (parents and students)
- Lottie animations to attract students
- Highlight top-performing students with gamified badges

👩‍🏫 2. About Us

- School History with timeline animation
- Principal's Message (video or audio)
- Vision, Mission, and Core Values
- Hover-animated leadership team cards
- Staff Directory
    - Teachers (flip cards with profiles)
    - Non-teaching Staff
- Infrastructure Highlights:
    - Smart classrooms
    - Science, Computer, and Math labs
    - Library
    - Sports facilities

    - Transport
- Awards & Achievements wall with animations

📚 3. Academics

- Curriculum Overview:
    - Primary (1st–5th)
    - Middle School (6th–8th)
    - High School (9th–10th)
- Downloadable list of subjects
- Interactive academic calendar
- Teaching methodology illustrated with icons and visuals

🏆 4. Co-curricular Activities

- Interactive tiles for each activity
- Short video showcases
- Event photo walls

📝 5. Admissions

- Highlight cards for "Why Choose Us?"
- Step-by-step admission process flow
- Eligibility criteria and document list
- Fee structure overview
- Online Admission Form with progressive form display
- Skeleton loader during form load
- FAQ section with expandable accordions
- Scholarship highlights for top students

🏛️ 6. Facilities

- Interactive campus map
- Smart classroom virtual tour
- Hostel life gallery with testimonials

- Cafeteria menu previews
- Medical and counseling services
- Live preview of transport tracking system

🖼️ **7. Gallery**

- Filterable albums (events, sports, academics)
- Lazy-loaded video gallery
- 360° virtual school tour

📰 **8. News & Updates**

- Live auto-refresh news feed
- Skeleton loaders on news cards
- Circular downloads
- RSVP-enabled event invites

✍️ **9. Blog**

- Interactive blog post cards
- Featured articles in a carousel
- Commenting system for student/parent engagement

📞 **10. Contact Us**

- Embedded Google Map
- Dynamic contact form with error handling
- Skeleton loading on form load
- Social media icons with hover animations

🔐 **Secure Portals (Supabase Authentication & Access Control)**

👩‍🎓 **11. Student Portal**

- Personalized dashboard with profile avatars
- Interactive class schedule calendar

- Attendance reports with visual graphs
- Drag-and-drop assignment submissions
- Embedded live online classes
- Exam portal interface
- Real-time fee status and receipts
- Push notifications for announcements
- Secure message system for teacher communication
- Searchable e-library access
- Leave request forms
- Daily MCQ test section
- Gamified badges and leaderboard
- Points for attendance, assignments, quizzes, and MCQs
- Real-time exam result notifications
- Smart learning paths with unlockable achievements

👨‍👧 12. Parent Portal

- Personalized dashboard for child overview
- Academic progress visualized with progress bars
- Attendance summary
- Assignment and homework tracking
- Teacher-parent communication tool
- Easy fee payment gateway
- Circular download section
- Monitor leave applications
- Event/facility rating and feedback system

👩‍🏫 13. Teacher Portal

- Dashboard with task cards
- View of assigned classes and subjects
- One-tap student attendance marking
- Bulk assignment uploads

- Online class integration (Zoom/Google Meet)
- Simple exam paper uploads
- Spreadsheet-style marks entry
- Visual student performance analytics
- Parent communication feature
- Create daily MCQ tests with timers
- Detailed MCQ analytics (marks, rankings, per-question analysis)
- Exportable reports
- Gamification dashboard for student badge tracking
- Teacher leaderboard with points
- AI-based student improvement suggestions

👩‍💼 14. Student Coordinator Panel

- Role-based dashboard for student coordinators
- Assign and manage class schedules for teachers and students
- Update or reschedule class timings
- Promote/demote students to different classes or academic years
- Bulk assign or remove students from classes
- Add new students to the system
- Remove students from the system (with proper confirmation flow)
- Generate unique ID and default password for each new student
- Students can log in and change their password securely after first login
- Monitor assignment progress across classes
- Schedule substitute teachers
- Generate academic progress summaries
- Track extracurricular involvement for students

🏢 15. Admin Panel

- Central dashboard with KPI widgets
- Live analytics and visualizations (connected via Supabase)
- Manage students, teachers, classes, fees, and exams

- Live fee collection tracker
    - Currently supports **cash payments only**
    - Roadmap to implement **online fee payment** (UPI, cards, net banking) (coming soon)
- Visual route planner for transport
- Inline content management editing
- Payment gateway settings panel
- Role-based access and permission management
- Real-time multilingual content translation
- Set/manage gamification logic
- Automated fee reminders
- Push notification system for events and alerts
- Generate unique ID and password for:
    - Students
    - Teachers
    - Student Coordinators
    - Media Coordinator
    - Non-teaching staff
- Admin can reset any user's password
- View and monitor all activities across portals

📚 16. Librarian Panel

- Add, edit, or remove books from the digital library
- Track issued and returned books with due dates
- Generate ID and password for library system access
- Manage fine collections for late returns (cash for now, online later)
- Student and teacher borrowing history
- Book reservation system with waitlist feature
- Real-time library inventory dashboard
- Searchable catalog with filters
- Digital reading room (PDF previews and access tracking)

🌐 17. Media Coordinator Panel

- Upload and manage image galleries and albums
- Upload and organize school videos
- Post school news, circulars, and announcements
- Tag and categorize content for filters/search
- Schedule when media or news goes live
- Archive old content
- Moderate comments on media and blog (if applicable)
- Track engagement metrics (views, shares, likes)

📦 Other Smart Modules

🌐 18. E-learning Section

- Auto-progress saving for video lessons
- Smart-search enabled study material
- Time-limited online quizzes
- Auto-generated course completion certificates
- Offline access for select lessons and assignments

🎓 19. Alumni Portal

- Alumni registration form
- Success story posting (with approval workflow)
- RSVP for alumni meets and events

💬 20. Chat & Support System

- Real-time chat with teachers
- Ticket-based IT support system
- AI chatbot for 24/7 FAQ support

📄 21. Download Center

- Brochure and syllabus downloads

- Past year paper archive (with filters)
- Event forms and notices

📊 **22. Analytics Section**

- Graph/table views for student progress
- Attendance heatmaps
- Fees collection trends visualization
- Exam results statistics
- Transport usage reports
- Gamification leaderboard analytics

📈 **23. Smart Add-ons**

- Progressive Web App (installable)
- Health check system for students
- RFID/barcode-enabled smart library
- Scholarship management module
- Live dynamic leaderboards for events

This architecture allows frontend and backend to work in real-time synergy. Supabase handles database, authentication, and storage, while frontend tools (like V0.dev or React) consume that data to deliver a smart, seamless, and interactive user experience.

Together, these modules and features create a comprehensive, engaging, and future-proof school management website that truly earns the title of a “Smart School.”
